SUMMARY

Recent Master of IT graduate with hands-on experience building web applications using React, TypeScript and Node.js. Completed a capstone project delivering a full-stack booking platform and an internship contributing to a customer-facing dashboard. Looking to bring strong front-end fundamentals and a collaborative approach to a Junior Frontend Developer role.

SKILLS

JavaScript, TypeScript, React, HTML, CSS, Redux, Node.js, Express, REST APIs, Git, Jest, Figma, Tailwind CSS

EXPERIENCE

Frontend Developer Intern, BrightPath Digital

02/2024 - 07/2024

Supported the web team on a customer dashboard product built with React and Redux.

- Rebuilt the dashboard's filter component using React hooks, replacing an older class-based version.
- Wrote Jest unit tests for the new filter component to cover edge cases the team had previously handled manually.

- Worked with the design team to translate Figma mockups into responsive Tailwind CSS layouts.

- Improved the loading experience of the dashboard's main table by introducing skeleton loading states.

Junior IT Support Assistant (Part-time, while studying), Campus Tech Helpdesk

03/2022 - 12/2022

- Resolved student and staff laptop and Wi-Fi connectivity issues during scheduled shifts.
- Documented common troubleshooting steps in a shared knowledge base used by the helpdesk team.
- Assisted with onboarding new helpdesk volunteers by walking them through ticketing software.

PROJECTS

TableTime - Restaurant Booking Platform

GitHub: github.com/priyanandakumar/tabletime

- Built a full-stack booking application with React front-end and Express/Node.js back-end, including a calendar view and email confirmation flow.

- Implemented authentication with JWT and protected booking routes for logged-in users.

- Deployed the app using Netlify (frontend) and Render (backend) for the capstone demo.

ExpenseSplit - Group Expense Tracker

GitHub: github.com/priyanandakumar/expensesplit

- Created a React and Redux app that lets users split shared expenses and track balances between group members.

- Added CSV export of expense history using a lightweight Node.js API endpoint.

EDUCATION

Master of Information Technology

Greenfield University

02/2023 - 11/2024

- Capstone project: TableTime booking platform (see Projects).
- Relevant coursework: Web Application Development, Human-Computer Interaction, Software Engineering Practice.

Bachelor of Computer Applications

Sunrise College

06/2018 - 05/2021

CERTIFICATIONS

- freeCodeCamp: Responsive Web Design (2023)
- freeCodeCamp: JavaScript Algorithms and Data Structures (2023)
